

# Home Automation & Security

## Home Automation Service

The LifeGuard SmartHome can be used to provide home automation features, e.g. to automatically turn on/off power points and lights, or even to lock or unlock your doors. Grant someone entry to your home without getting up, or turn on a light in another room before getting out of bed.

You can control these features from the device, or the Nurse from INS LifeGuard can control them if needed during an emergency (e.g. to unlock your front door to allow emergency services to enter).

***There is no cost for using the Home Automation service***, but depending on the features you wish to use, you will need to purchase specific accessories. The available accessories are shown on the reverse side of this flyer.

## Added Security for Peace of Mind

The LifeGuard SmartHome can also be connected to monitored Infra-Red Beams (PIRs), thus providing home security by monitoring movement in and around your home. This service can provide added peace of mind, helping to ensure your family and home are safe. You'll need to purchase an Infra-Red Beam (PIR) shown on the reverse side of this flyer. This service incurs a monthly monitoring fee.

## Home Automation & Security Accessories

---

### Infra-Red Beams (PIRs)

INS LifeGuard's Infra-Red Beams are wireless. They can be used to detect movement, thereby providing a monitored household security system.

Price..... \$114.02

Monthly Monitoring fee..... \$15.48

### Remote Power Switch

Turns power on or off at specific locations (e.g. to turn off an appliance that was left on). Requires an INS LifeGuard SmartHome or SmartKiosk.

Price..... \$54.30

### Inline Light Controller

For turning lights on or off automatically (e.g. if you need to get out of bed at night or in common areas within villages). Requires an INS LifeGuard SmartHome or SmartKiosk.

Price..... \$101.76

### External Strobe Light

Activating an outdoor strobe light in the event emergency services were summoned to assist helps them locate the proper unit, e.g. in a retirement village setting.

Price..... \$211.40

### Door Strike

For automatically locking or unlocking doors, either in private homes or within a retirement village setting. Requires an INS LifeGuard SmartHome or SmartKiosk.

Price..... \$128.27
