

Optional Service

\$7.13

per month

per 450MB or part thereof.
Requires INS LifeGuard's
3G SIM and an
establishment fee.

Internet Browsing

The LifeGuard SmartHome can be used for basic internet browsing and social media applications such as Facebook, YouTube, Skype and Email with our optional added Internet Browsing service.

Stay up-to-date with the latest news, listen to your favourite music, and much more for a low fee with our managed 3G or 4G M2M mobile service.

Research confirms that being socially isolated can negatively affect both mental and physical health. INS LifeGuard SmartHome can assist to maintain participation in family, community and social spheres. With this service you can stay connected with family and friends, especially important for those who may live far away.

Internet Connectivity options

If your home isn't internet-connected, simply add our LifeGuard/Vodafone M2M Data SIM. It's the perfect addition supplying a connection to the LifeGuard SmartHome independent of home cabling or telecommunications services. So you don't need your current telephone service or future NBN connection. The LifeGuard M2M service provides easy connection of the SmartHome, doing away with the need for cabling or technicians.

For Villages, INS can lay the infrastructure framework to provide I.P. technology delivering voice and internet services either via current Copper, CAT or Fibre cabling, via a managed 3G SIM service, or our exciting new wireless WiFi technologies.
