

“Talking” Call Point

With Two-Way Voice Communication

L-23RV “Talking” Call Point

Our **Voice Reach Talking Call Point** is designed to be compatible with any of our L Series RV Dialers. It can be mounted anywhere in the home for added assurance.

Certified to IP44, the Talking Call Point can provide additional protection in areas of the home where you're most at risk, for example in the bathroom where there's a higher risk of slips and falls.

The simple press of a button opens up two-way communication between you and our Emergency Response Centre, and the built-in microphone and speaker lets you talk to our nurse right through the call point like a speaker phone.

Features

- Two-Way hands-free voice communication allows a nurse in our Central Monitoring Station to talk to the user, and listen-in to what is happening on his/her side through the built-in microphone and speaker without moving to be near the console unit
- Low battery indicator

- Waterproof, IP44 certified
- Ultra low power consumption
- Excellent voice quality; answer calls remotely within 12M from the L-23RV Talking Call Point
- Compatible with our L-401RV and L-502RV Diallers
