

# Voice Reach “Talking” Emergency Pendant

With Two-Way Voice Communication

## LWNVTX “Talking” Emergency Pendant

Our Voice Reach Talking Pendant is the smallest and least obtrusive in the market. Compact and easy to use, the Talking pendant summons assistance whenever you need it, at any time of the day or night.

It is designed to allow immediate voice contact during an emergency call. Within the signal range (100-150 meters) of the console unit, the simple press of a button can open up **two-way voice communication** between you and our Emergency Response Centre. The built-in microphone and speaker lets you talk to our Nurse right through the pendant like a speaker phone.

To ensure it's functioning properly, a test button is provided so you can easily check for low battery. With such intelligent features, rest assured knowing your emergency alarm is responded to promptly.

## Features

- Smallest and least obtrusive talking pendant in the market
- Two-Way hands-free voice communication allows a nurse in our Emergency Response Centre to talk to the user, and listen-in to what is happening on his/her side through the built-in microphone and speaker without moving to be near the console unit

- Ultra low power consumption
- Compatible with our L-401RV and L-502RV Diallers
- Can be worn around the neck as a pendant

## Specifications
