## Introducing LifeGuard Mobile

With LifeGuard Mobile, you can take your alarm with you wherever you go. LifeGuard Mobile is a fully featured medical alarm system that operates on your compatible† Android smartphone, so it's not tethered to the base unit in your home. Messages, tasks, etc., that are delivered to your LifeGuard SmartHome IP Dialler can also be received on the LifeGuard Mobile.

Pressing the HELP button on LifeGuard Mobile works just like the standard pendant or wrist transmitter in your home, sending an alarm through to our 24/7 Emergency Response Centre. The built-in GPS locator ensures that in an emergency our nurses will be able to locate you, speak to you, and send assistance — even if you are not able to respond.

The LifeGuard Mobile provides assurance that you can contact a nurse at any time of the day or night, *wherever you may be* — at the press of a button.

### Special Introductory Offer Pricing

**For a limited time**, we're offering **Special Introductory Pricing** for both the Establishment Fee and monthly monitoring fees for the first 12 months.

*(For new LifeGuard Mobile customers only.)*
