LifeGuard SmartHome Mate

A unique, smart companion to your **LifeGuard SmartHome IP Dialler** — it provides added functionality as a call point (so you can summon assistance with the press of a button), and also supports many of the features and functionality of the SmartHome IPD, allowing you to operate the system remotely.

- Portable - take it with you around the house.
- Exciting new **SmartAlert voice activation** - activate many features simply by speaking to the unit.* (Say “LifeGuard Help Help” in close proximity to the SmartHome Mate to trigger an alarm.†)
- Connects to the new LifeGuard SmartDoorbell and SmartCamera for added security*
- Summons help in an emergency
- View messages, alerts and notifications from the LifeGuard SmartHome
- Conduct Audio/Video calls with our nurse
- Play music, or keep up with current events via a Newsfeed*
- Video Intercom (using our WiFi Doorbell) — see and speak to visitors*
- Use optional services you may have, such as Telephone Service, Internet Browsing, TeleHealth Service, Home Automation, My Concierge, etc.*

* In development.

† Always use a transmitter to activate your alarm if you're able to. In the event you can't press your transmitter or call point, the SmartAlert voice activation provides an alternate method to summon help. You must be in close proximity of your SmartHome Mate to use voice activation.
