Optional Mia wrist or pendant transmitter

Introducing our new, improved Mobile Alarm System

LifeGuard SmartMobile

with included LifeGuard SmartDock and optional Mia Bluetooth wrist or pendant transmitter

- Whilst docked, it's a clever companion to the SmartHome IPD that can extend its functionality to any room in your home – whilst maintaining key mobile phone functions
- Pick it up and it's a mobile alarm and much more that you can take with you anywhere

The LifeGuard SmartMobile with SmartDock lets you take your alarm with you wherever you go. Pressing the HELP button sends an alarm through to our 24/7 Emergency Response Centre. The built-in GPS locator ensures that in an emergency our nurses will be able to locate you, speak to you, and send assistance — even if you are not able to respond.

Two-way voice communication — so even if you can't physically answer an incoming call, the SmartMobile can auto-answer in an emergency so we can still talk to you. Whilst docked it's charging wirelessly, and features enhanced audio quality via the microphone and speakers in the dock. The SmartMobile also keeps key benefits of a mobile phone.

Purchase LifeGuard SmartMobile with Wireless Charging Dock

	With existing Monitoring Service	Without existing Monitoring Service
Purchase Price†	\$450.00	\$450.00
Monitoring Fee	per month \$6.50	per month \$30.00

SmartMobile Features

- Fully featured mobile phone and Medical Alarm – just like a standard pendant or wrist transmitter, pressing the HELP button on the LifeGuard Mobile sends an alarm to our 24/7 Emergency Response Centre
- 2-Way Voice and optional Video Alarm response by the LifeGuard Emergency Response Centre
- Google Assistant incorporated, allowing you to command the device via voice (e.g. LifeGuard Help Help to send an emergency alarm)
- Compatible with “Mia” – our upcoming BT5 wrist or pendant transmitter
- Can be used in SmartVillage Wi-Fi enabled Village Sites without need of a SIM and act as a second cordless phone inside and outside the home
- Wi-Fi, 3G or 4G connectivity
- Can be provided with a low-cost LifeGuard 4G SIM
- Can make and receive mobile calls via LifeGuard’s data network potentially achieving significant call cost savings
- Ability to record vital signs or add our optional full-featured TeleHealth Service (features shown at right).
- GPS Locator - in the event of an emergency our Response Centre nurses are able to locate you and direct Emergency Services to your location
- Geofence alarms – automatically notify contacts if user leaves set areas.
- Tracking for dementia / Alzheimer’s with alarms sent if wandering
- *Concierge Service (optional)* — assistance with arranging appointments and booking taxis, electricians, gardeners, handymen, and much more
- *Coming Soon* – the ability to call the SmartMobile from the Manager’s and Client Portals (family can conduct voice or video calls[§]).
- Medical information / chat line
- Medication reminders

LifeGuard Mia Pendant Features

- Features a screen that displays the same notifications, messages, tasks etc. that appear on your SmartHome IPD.
- Confirmation of alarm status with two-way feedback.
- Bluetooth 5.0 for increased bandwidth with low energy.

SmartDock Features

- When the SmartMobile is docked, it acts as a clever companion to your existing SmartHome IP Dialler
- Wireless charging – simply place the phone centred on the front of the dock
- Built-in microphone and speakers enhance the audio quality of the LifeGuard SmartMobile

TeleHealth Features

The SmartMobile gives you the ability to record vital signs – either wirelessly using our approved range of monitors (BP, BSL, pulse, temperature, weight and ECG) or manually using your existing devices. You can access the stored data at any time via our free Client Portal, and you can even share an electronic report with your GP, if desired.

Optional TeleHealth Service

The LifeGuard SmartMobile can let you take advantage of our optional TeleHealth Service, which assists with monitoring people’s health right in their own home. [◊] It’s particularly useful for those with medical conditions such as diabetes, COPD, chronic heart failure or unstable blood pressure. Vital signs (blood pressure, blood sugar levels, pulse, and various other measurements) can be automatically recorded and sent to a nurse at INS LifeGuard for monitoring. If the readings are of concern, our nurse will action and follow-up with you.

Automatic or Manual Entry of Measurements

We can supply Bluetooth capable monitoring devices that can automatically send your vital sign measurements to the SmartMobile. If you prefer to use existing non-Bluetooth capable devices, the results can be manually entered into the SmartMobile using the touch-screen. Either way, the results will be monitored by a Registered Nurse in our Emergency Response Centre.

Registered Nursing Reviews

You can also receive a monthly Registered Nursing Review. Simply schedule an appointment via the SmartMobile. At the appointed time, our nurse will initiate an audio/video call. During the review our nurse will discuss with you any health issues, review your previous month’s data, and if required and agreed, forward a report to your medical practitioner.

Features subject to change at discretion of INS LifeGuard.

[§] Requires optional Internet Browsing package with LifeGuard SIM or BYO SIM.

[◊] TeleHealth functionality in development, coming soon.
