

## LifeGuard SmartTracker

You want to remain independent, free to go about your normal daily activities and do the things you love. But your family worries when you're on your own. The solution? INS LifeGuard's newest Mobile Alarm System known as the SmartTracker. With the press of a button, you're in contact with an experienced nurse. ***That's unique to INS LifeGuard!***

Simply press a button to send an alarm to a nurse in our 24/7 Emergency Response Centre. The nurse can speak with you via speakerphone and assess the situation. The built-in GPS locator ensures we'll be able to locate you in an emergency and send help — even if you are not able to respond.

The LifeGuard SmartTracker is perfect for seniors who like to be independent and active, as well as for WHS, lone workers or children. It is a stylish pendant that works using the same cellular phone technology as a mobile phone, but without the complicated features. It also functions as a fall detector, and has a docking station for easy charging.

Unlike other systems that depend on a friend or family member being available when you need help, our systems can send an alarm through to a nurse in our 24/7 Emergency Response Centre — *so help is always available.*

The LifeGuard SmartTracker provides assurance that you can contact a nurse at any time of the day or night — wherever you are. And your loved ones will have peace of mind knowing that help is at hand if you need it.
